

Industrial Catalogue 2011-12

**National Tiles
& Ceramics Ltd**

www.nationaltiles.com

Types

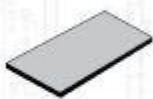

"We manufacture a wide range of ceramic tiles. All our tiles are carefully selected for quality and appearance."

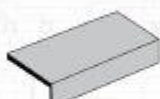

National Tiles are corrosion-resistant tile which are manufactured through high temperature oxidation decomposition by using quartz, feldspar, clay as the main raw material. It has such characteristics, high PH resistance and low water absorption, hard to oxidation and be polluted by media at normal temperature, etc.. Besides, it has good anti corrosive effect to the acid, warm chlorine brine, hydrochloric acid, sulfuric acid, nitric acid, etc., and to alkali of any concentration at room temperature except hydrofluoric and hot phosphoric acid. Uses drawings and samples can all be processed and custoized. Acid-resistant tile is widely used in Textile tile units, petroleum, chemical, Electric Cable manufacturing or metallurgy, electric power, chemical fiber, paper-making, pharmaceutical, fertilizer, food, dairy, fruit juice, electroplating room, as well as lined-masonry of towers, tanks, cans, chutes and other anti-corrosion engineering. It can exert the anti-corrosion ability in underground sewers and open ground workplace. We can produce products with different specifications according to uses requirement.

Industrial Tile
268x132x13-15mm

Standard Tile
268x132x10mm

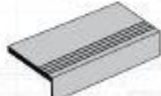

Plain Angle
52x115x268x10mm

Industrial Tile
125x255x20mm

Facing Strips
66x268x10mm

Step Angle
52x115x268x10mm

Step Tile
190x 268 x10mm

Skirting Tile
17x132x268x10mm

CHECKERED TILE

National Tiles, "Checkered Tiles" are designed for specialized requirements only. This series is used in mainly spaces where extreme grip is required.

The special Checkered Tiles can be manufactured in 10mm & 20mm thickness, depending on the area being used.

STAIR CASE / STEP TILES

National Tiles "Step Tile" is an extremely durable product that does not wear, even under heavy foot traffic. It is also very easy to clean. Professional installation is recommended, especially for curved or spiral staircases. Epoxy grout is recommended for greater resistance.

National Tiles "Step Tile", comes in many shades to compliment the client's needs and the color combination of the surroundings feel.*

Mosaic Tiles

Mosaic tiles are yet another one of National Tiles' special offers for people with an artistic bent.

These tiles are specifically designed and mixed in colours to stand out strikingly in a layout yet retain their elegance through all changing fashions.

For people who want to experiment with their layouts and customize their mosaic patterns with specific colours other than the ones we offer, we make available our team who not only strives to meet all our customer's needs but also advises and provides professionals who lay the tiles precisely the way they're meant to be laid.*

LABORATORIES COMPLEX, FEROZEPUR ROAD, LAHORE-54600

Doc. # ILLC/MSDP/0032 | Issue Date: Jan 06, 2007 | Issue # 01 | Rev. # 01

TEST REPORT

Report No: G&C/RM/03/2011/18/

Date: 30.06.2011

Name & Address of Customer: 8th Floor, Al-Sehat Centre, Annexe Regent Plaza Hotel, Rafiqi Shaheed Road, Karachi.

Request Ref. # & Date: Nil dated 23.06.2011

Sheet No: 1

Description of Sample: Ceramic Tile
(One sealed box containing eight National Tiles 255mm x 125mm x 20mm)

No. Of Sample(s): One

ILO Log # and Date: 482 dated 23.06.2011

Ref/Code #: 18/2011

Method used /Specs: ASTM C-373 & ASTM C-650

Temp. & Humidity: N.A

Statement of Non-compliance: Nil

Testing Date: 24-29/06/2011

RESULTS

1. Effect of hydrochloric acid (HCl) = Not affected
2. Effect of sulphuric acid (H_2SO_4) = Not affected
3. Effect of nitric acid (HNO_3) = Not affected
4. Effect of phosphoric acid (H_3PO_4) = Not affected
5. Effect of sodium hydroxide (NaOH) = Not affected
6. Water absorption = 1.90%
7. Quenching at 100°C = Not affected after 10 cycles
8. Dimension Tolerances
 - i) Length = -1.18%
 - ii) Width = +0.80%
 - iii) Thickness = 0.00%

END

- This test report is based solely on the particular sample(s) supplied by the client and should not be reproduced in part.
- Sampling has not been performed by the PCSIR Labs and the PCSIR does not accept the responsibility that the sample(s) supplied were truly representative sample(s) of any batch or stock or entire production.
- While the PCSIR agrees to take every reasonable precaution to ensure validity of its test results, it assumes no liability thereof beyond the amount of the fee charged for the analysis.
- The party shall assume full responsibility for the ethical use of the results in the test reports and the laboratory shall be held free from any and all claims, which may result from the use of such data by the client or others.
- This test report shall not be reproduced wholly or in parts unless negotiated.
- After completion of the report the sample will be preserved for one month until negotiated otherwise.
- The contents of this report cannot be, in any manner, used for the publicity of the product or any advertisement.
